

IDEATION AND PROTOTYPING

# Rethinking data

A perfect example of redesigning a particular component is the 'Key Figures' data. Users told us that the bar charts aren't particularly useful in visualizing dollar amounts in linear/time-based manner.

IDEATION AND PROTOTYPING

# Rethinking data

The simple solution was to separate each attribute into a different graph and I added an interactive component where users can simply trace the line to see the dollar amounts in a particular year.

OVERVIEW

## Key figures
