On accessibility

All UN websites are _required_ include several features
designed to improve accessibility for users with temporary or
long-term disabilities, following the Web Content Accessibility
Guidelines (WCAG) of the World Wide Web ConsortiumWeb
Accessibility Initiative (W3C WAI)

This is _mandated_ by the UN General Assembly.

On accessibility

Design checklist

1. Content hierarchy is clear and properly defined.

2. All media are properly tagged, transcripts must be available for audio and video

3. Test color contrast and for the visually impaired and the color blind - All the color combinations in the page pass level AAA or AA for regular text size.

4. Make sure there are no flickering elements on the page. Check that users have full control of the carousel with keyboard and mouse. Check how the page looks when styles and images are disabled.

5. Multilingualism
